WHY YOU SHOULD USE VAL-MATIC® "SURE SEAL FOOT VALVES"

Design of the "Sure Seal Foot Valve" evolved through a need for a valve that could provide positive sealing action at various pressure ranges without seal damage along with silent operation.

The Val-Matic "Sure Seal Foot Valve" satisfies these requirements plus low head loss thru its full ported area and heavy duty stainless steel basket screening.

The unique seating design provides initial contact with the valve disc and the Buna-N ring, providing a drop-tight seal. As the pressure increases, the Buna-N ring is compressed slightly and the disc makes contact with the metal portion of the valve seat, preventing any further compression of the Buna-N ring. The Buna-N ring will continue to provide the "drop-tight seating" during the higher pressure ranges without damage from the increased pressure loading.
